

Student Data Integrator

Enabling Seamless Integration to Student Information Systems

Schools and districts rely on data-driven information systems – from the student using the reading and math intervention program to the administrator who must generate a robust district-wide report. As each software program is introduced to the system, the task falls upon information technology (IT) professionals to integrate the disparate programs to ensure users receive maximum benefits from the overall investments.

AutoSkill understands the challenge IT professionals face. That’s why we developed Student Data Integrator, a SIF-compliant software module that will seamlessly interoperate with student information systems (SIS). For schools and districts that have not implemented SIF into their SIS, a customized version of the Student Data Integrator is available with all the same features and benefits. When administrators choose Academy of READING®, Academy of MATH® or SpanishTutor™, IT professionals can be confident that the Academy Suite will seamlessly integrate to the backbone of the district-wide or building level SIS.

Benefits to IT Professionals

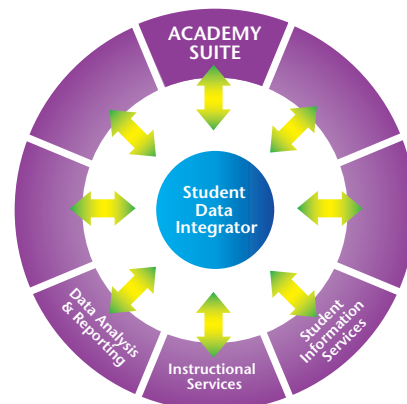

- Integrate Academy Suite to the SIS backbone with ease
- Automate synchronization of data to the SIS
- Streamline data management activities
- No new hardware required – runs on AutoSkill server

Benefits to Administrators

- Consolidate student data
 - Class demographics and registration
 - Teacher registration
- Improve data integrity, accessibility, and reporting
- Simplify year-end AYP analysis
- Maximize investment in technology
- Manage data in high mobility districts
- Scalable
 - Supports as many students as are registered in SIS
 - Grows with the district/school

Specialized Professional Services

For districts and schools requiring seamless integration to their SIS, AutoSkill Professional Services collaborates with your IT professionals and administrators to optimize planning and ensure a successful implementation of the Student Data Integrator.

Academy Suite tightly integrates to SISs to reduce IT complexity and maximize the district and schools’ investment in technology.

SIF™ 101

The School Interoperability Framework (SIF) Association has proposed an open standard to ease exchange of critical data within a district. Districts and schools choosing SIF-compliant software programs will be able to maximize efficiency in terms of simplifying tasks, reducing opportunities for error, and saving time. In a SIF-compliant scenario, a new student need only be entered into the system once. When entered, applications within the network “talk” to one another to automatically enroll the student in other programs. For more information, visit www.sifinfo.org

AutoSkill's SIF-compliance Commitment

AutoSkill's Student Data Integrator software module provides SIF-ready Academy of READING, Academy of MATH and SpanishTutor to districts and schools that have adopted the SIF standard.

About AutoSkill® International

AutoSkill creates award-winning intervention solutions to help close the achievement gap in K-12 schools. For over 17 years, its research-based programs have helped at-risk students to build fluency in the foundation skills of reading and math.

The company's core products, Academy of READING and Academy of MATH, deliver rapid, permanent gains so students progress in their education and administrators meet AYP targets. For more information, visit www.autoskill.com.
